Becoming a Community Scientist (& a Better Naturalist): How You Can Help Bees and Other Pollinators

Denise Ellsworth

The Ohio State University

*How many bee species
call Ohio home?*

*How can I help bees
and other pollinators?*

We need more community scientists to help answer these questions! Denise will help us explore the role of community science in bee (and other pollinator) conservation. We'll delve into The Ohio Bee Atlas on iNaturalist, discussing how this platform can help us to improve ID skills and get enthused about the natural world. Denise will also share a smorgasbord of other community science projects just waiting for your input!

This event is hosted by The College of Wooster and The Ohio State University
