Getting to Know the Neighbors: Squirrels, Obsessions, and Long-term Data

Rick Lehtinen

The College of Wooster

Did you know that there are several species of squirrels living right here in Wooster?

Are the black and gray squirrels different species?
Why are there different colored squirrels?

Dr. Lehtinen will answer these questions and more as he introduces our squirrel neighbors and describes findings on color polymorphism in the squirrels of Ohio and beyond! Come learn about squirrels and the scientific process of discovery.

This event is hosted by The College of Wooster and The Ohio State University
